Summary

Full Stack Developer building web and mobile applications with **React.js**, **Next.js**, **React Native**, and **Node.js**, working across both **SQL** and **NoSQL** databases. Actively exploring **AI/ML** — building solutions with **RAG pipelines** and **LLMs** — and sharpening problem-solving through **DSA**.

Technical Skills

Programming Languages: JavaScript, Java, Python, SQL, C, C++
Frontend: React.js, Next.js, React Native, HTML, CSS, Tailwind CSS
Backend: Node.js, Express.js, FastAPI, RESTful APIs, JWT Authentication, LLM APIs, gTTS
AI / ML: Scikit-learn, Pandas, NumPy, Matplotlib, Whisper, Sentence Transformers, Joblib, Hugging Face
Databases: MongoDB, MySQL, Supabase, Firebase, PostgreSQL, Qdrant
Cloud and Deployment: AWS, Docker, Vercel, Render, Netlify, Railway, Cloudinary
Tools and Platforms: GitHub, Kaggle, Postman, Thunder Client, Figma, Android Studio, VS Code

Education

Vivekanand Education Society's Institute of Technology, Mumbai — **Aug 2024 – May 2027**
B.E in Computer Engineering — CGPA: 9.16 / 10

Vivekanand Education Society's Polytechnic, Mumbai — **Aug 2021 – June 2024**
Diploma in Computer Engineering — Percentage: 84.97%

Experience

Web Developer — **March 2026 – Present**
Odyssey Homes — Mumbai, India

- Built a luxury real estate portal showcasing **50+** properties — villas, farmhouses, and twin houses — with dedicated listing pages, enquiry forms, and dynamic content.
- Developed **3** core modules — property listing, enquiry handling, and content management — using React.js, Node.js, Express.js, and MongoDB.
- Built RESTful API endpoints for property browsing and enquiry submission, ensuring a smooth and responsive user experience across devices.
- Improved page load performance through code splitting, image compression, and lazy loading strategies.

Full Stack Developer — **July 2024 – September 2025**
AIBI — Mumbai, India

- Built and maintained multiple web and mobile applications using React.js, React Native, Node.js, and Supabase, following structured SDLC workflows.
- Managed **1,000+** structured records through reliable REST APIs, reducing manual overhead and operational workload significantly.
- Secured application access using **2** layers of protection — JWT-based authentication and role-based authorization.
- Integrated **2** AI services — Gemini API and text-to-speech — to power intelligent features across products.

Mobile Application Developer — **December 2023 – May 2024**
Sinjan Solutions Pvt. Ltd. — Mumbai, India

- Developed a QR attendance tracker with React Native and Firebase monitoring live attendance for **100+** users.
- Reduced verification effort by **40%** through process automation and streamlined validation.
- Identified and fixed **3+** critical authentication bugs related to duplicate entries and expired QR validation, improving app reliability.
- Conducted thorough testing across modules to identify and eliminate bugs, ensuring a smooth user experience.

Web Developer — **June 2023 – July 2023**
Insys Technologies — India

- Built responsive, cross-device-compatible web applications using HTML, CSS, JavaScript, PHP, and MySQL.
- Developed a course management system with modules for course owners to manage content and for students to track their enrolled courses.
- Optimized MySQL database queries through proper indexing and query structuring, improving data retrieval performance during testing.

Projects

RevAI – AI Video Revision Assistant | *React.js, Tailwind CSS, FastAPI, Python, yt-dlp, whisper, RAG, Groq API, Qdrant*

- Developed an AI-powered video revision platform that transforms educational playlists into a searchable knowledge base, enabling users to retrieve relevant concepts through natural-language queries.
- Implemented a RAG pipeline using Python, Whisper, embeddings, and Qdrant vector database to process video content, perform semantic retrieval, and generate context-aware responses.
- Built a timestamp-aware interface that delivers AI-generated answers with relevant video links and timestamps, allowing users to directly revisit the exact portion of a lecture.

Multi-Cloud Spot Instance Arbitrage Engine (Ongoing) | *React.js, FastAPI, MongoDB, Pydantic, Docker, Groq API, AWS, GCP, Azure*

- Engineering a multi-cloud cost optimization platform integrating cloud pricing services across **AWS, GCP, and Azure** to evaluate Spot/Preemptible instance pricing and identify cost-efficient compute alternatives.
- Developing a **pricing normalization and cost optimization engine** to calculate infrastructure costs, migration overhead, estimated savings, break-even points, and workload compatibility using deterministic decision logic.
- Designing a **Docker-based cross-cloud migration workflow** using FastAPI and MongoDB, incorporating migration state management, health-check validation, DNS failover logic, and workflow tracking.

PhishGuard – AI-Based Phishing Detection | *Python, Pandas, NumPy, Matplotlib, Scikit-learn, SciPy, Joblib*

- Developed an ML-based phishing detection system using **30** URL, domain, webpage, and reputation features from the UCI Phishing Websites dataset.
- Preprocessed the dataset, engineered the binary target, and trained a Logistic Regression model using StandardScaler and Scikit-learn Pipeline with an **80-20** stratified split.
- Evaluated predictions using accuracy, precision, recall, F1-score, and confusion matrix, and exported the trained model using Joblib for future inference.

StrideX – E-Commerce Platform | *Next.js, Tailwind CSS, Node.js, Express.js, MongoDB, Groq API, LangGraph, JWT, Qdrant, Razorpay*

- Engineered a full-stack e-commerce platform featuring conversational product discovery, enabling natural-language shopping based on budget, brand, size, and usage preferences.
- Architected a **multi-agent AI system** using LangGraph and Gemini API, integrating intent recognition, constraint extraction, semantic search, relevance-based ranking, contextual memory, and intelligent product recommendations.
- Developed **8+** RESTful API endpoints for authentication, product management, order processing, and Razorpay payments, leveraging MongoDB for data persistence and JWT for secure access control.

Speaking and Community

4-Day Workshop on React.js and Next.js | *VES Polytechnic, Mumbai*

- Conducted a hands-on session on modern frontend development and scalable web architecture for **60+** students.
- Guided participants through live project implementation covering React fundamentals, routing, state coordination, and deployment.

Publication

QR Attend – Android-Based Attendance Management System | *IJRPR*

- Authored a peer-reviewed research paper on a QR-code-based automated presence-tracking solution with real-time backend validation and Firebase integration.
- Planned and executed a QR authentication workflow for automated check-in tracking, reducing manual effort by **40%**.

Achievements

Invictus ’25 | Finalist at VESIT Technical Competition

Need For Code 4.0 ’25 | Top 12 Finalist at TSEC

Data Structures and Algorithms | Solved 350+ Problems on LeetCode and GeeksforGeeks
