SUMMARY

Full Stack Developer with 2+ years of internship experience delivering production-grade web and mobile applications using React.js, Next.js, Node.js, and React Native. Built and deployed RESTful APIs, integrated AI services, and reduced system load times by up to 40%. Passionate about building performant, user-focused applications with clean architecture and real-world impact.

TECHNICAL SKILLS

Programming Languages: JavaScript, Java, Python, C, C++, SQL

Frontend: React.js, Next.js, React Native, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, REST API Development, JWT Authentication, API Integration, Microservices

Databases: MongoDB, MySQL, SQL Server, Supabase, Firebase

Cloud and Deployment: AWS, Google Cloud Platform (GCP), Vercel, Render, Netlify, Cloudinary

Tools and Concepts: Git, GitHub, Postman, Figma, Android Studio, Data Structures, OOP, DBMS, Operating Systems, Computer Networks

EDUCATION

Vivekanand Education Society's Institute of Technology, Mumbai

B.E in Computer Engineering

Aug 2024 – May 2027

SGPA: 9.32 / 10

Vivekanand Education Society's Polytechnic, Mumbai

Diploma in Computer Engineering

Aug 2021 – June 2024

Percentage: 84.97%

EXPERIENCE

Web Developer

Odyssey

June 2024 – Present

Mumbai, India

- Developing and maintaining a responsive vacation home listing platform using HTML5, CSS3, and JavaScript, ensuring cross-browser compatibility and boosted user experience.
- Refined frontend performance and reduced average page load time by 40% through asset optimization, code refactoring, and efficient layout structuring.
- Enhanced on-page SEO by applying semantic HTML, structured metadata, and optimized image delivery to improve search visibility and indexing.

Full Stack Developer

AIBI

June 2024 – September 2025

Mumbai, India

- Architected and delivered scalable full-stack web and mobile applications using React.js, React Native, Node.js, and Supabase following Software Development Life Cycle (SDLC) best practices.
- Built and integrated RESTful APIs handling 1,000+ structured records, reducing manual workflow effort by 30%.
- Enforced secure authentication and authorization using JWT and role-based access control (RBAC).
- Incorporated AI services using Gemini API and text-to-speech tools to enable intelligent application features.
- Streamlined backend API performance and database queries, improving response time and scalability by 35%.

Mobile Application Developer

Sinjan Solutions Pvt. Ltd.

December 2023 – May 2024

Mumbai, India

- Built a QR-code-based attendance management system using React Native and Firebase, enabling real-time data synchronization for 100+ daily attendance entries.
- Automated attendance verification workflows, reducing manual processing effort by 40%.
- Strengthened authentication workflows and streamlined API communication to enhance application stability and performance.

Web Developer

Infosys Technologies

June 2023 – July 2023

India

- Developed frontend modules for an e-commerce platform using HTML, CSS, JavaScript, PHP, and MySQL.
- Applied AJAX-based asynchronous updates, reducing page reload frequency by 30% and increasing user engagement metrics.
- Improved MySQL query performance through database indexing and query tuning to enhance transaction processing efficiency.

PROJECTS

StrideX – Full Stack E-Commerce Platform | *React.js, Node.js, Express.js, MongoDB, Razorpay*

- Manufactured a full-stack e-commerce platform with product catalog, cart management, and secure checkout workflow supporting 10+ product categories.
- Delivered 15+ RESTful API endpoints for user authentication, product management, and order processing; integrated MongoDB for dynamic data storage with sub-second response time.
- Incorporated Razorpay payment gateway for secure online transactions and enforced JWT-based authentication with protected routes to secure all sensitive API endpoints.

AI Multiverse – AI Storytelling Platform | *React.js, Python, Gemini API, REST APIs, Edge TTS*

- Built a collaborative AI storytelling platform enabling multi-user text input, character selection, and voice-based narrative generation for 5+ concurrent users.
- Combined Gemini API for intelligent text generation with Edge TTS for real-time speech synthesis, reducing story generation time to under 3 seconds.
- Architected the backend to handle 20+ concurrent API requests asynchronously and streamlined frontend state management for under 100ms UI response time.

Crickify – Real-Time Hand Cricket Game | *React.js, Node.js, WebSockets*

- Built an interactive Hand Cricket web game supporting single-player (Computer) and real-time multiplayer modes with under 50ms latency.
- Leveraged WebSocket-based room generation with unique match codes and engineered turn-based game logic.
- Achieved zero game-state desync issues and structured scalable architecture for future tournament and leaderboard features.

TermiTalk – LAN Chat System | *Python, Socket Programming, Multi-threading*

- Crafted a secure LAN-based chat application enabling real-time messaging without internet connectivity, supporting 10+ concurrent users.
- Executed IP-based multi-client communication with private room functionality, admin controls (mute/kick), and a secure file-sharing system with receiver confirmation.
- Optimized multi-threaded server architecture for stable concurrent client handling with under 20ms message delivery time and zero unauthorized file transfers.

SPEAKING AND COMMUNITY

4-Day Workshop on React.js and Next.js | *VES Polytechnic, Mumbai*

- Conducted a hands-on workshop on modern frontend development and scalable web architecture for 60+ students.
- Guided participants through live project implementation covering React fundamentals, routing, state management, and deployment.

PUBLICATION

QR Attend – Android-Based Attendance Management System | *IJRPR*

- Published peer-reviewed research paper on a QR-code-based automated attendance system with real-time backend validation and Firebase integration.
- Designed and executed real-time QR authentication workflow for automated attendance tracking, reducing manual effort by 40%.

ACHIEVEMENTS AND CERTIFICATIONS

INVICTUS '25 | *Finalist*

- Reached the finals of INVICTUS '25, an intra-college technical fest at VESIT, Mumbai.

Data Structures and Algorithms

- Actively solving Data Structures and Algorithms problems on LeetCode to strengthen problem-solving fundamentals.
