SUMMARY

Full Stack Developer with 2+ years of expertise building scalable web and mobile applications using React.js, Next.js, Node.js, and React Native. Created REST APIs, integrated AI services, and improved performance by up to 40%.

TECHNICAL SKILLS

Programming Languages: JavaScript, Java, Python, C, C++, SQL

Frontend: React.js, Next.js, React Native, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Socket.IO, Gemini API, Text-to-Speech (Edge TTS, gTTS)

Databases: MongoDB, MySQL, SQL Server, Supabase, Firebase

Cloud and Deployment: AWS, Google Cloud Platform (GCP), Vercel, Render, Netlify, Railway, Cloudinary

Tools and Concepts: Git, GitHub, Postman, Thunder Client, Figma, Android Studio, VS Code, Data Structures, OOP, DBMS, Operating Systems, Computer Networks

EDUCATION

Vivekanand Education Society's Institute of Technology, Mumbai

Aug 2024 – May 2027

B.E in Computer Engineering

SGPA: 9.1 / 10

Vivekanand Education Society's Polytechnic, Mumbai

Aug 2021 – June 2024

Diploma in Computer Engineering

Percentage: 84.97%

EXPERIENCE

Web Developer

June 2024 – Present

Odyssey

Mumbai, India

- Built a production-grade vacation home listing platform using React.js, Tailwind CSS, Node.js, and MongoDB, delivering a fast and highly responsive user experience.
- Reduced average page load time by 40% through code splitting, asset compression, and improved rendering strategies across modules.
- Developed robust RESTful endpoints to support dynamic content delivery and real-time data synchronization efficiently.
- Improved search visibility and overall performance using semantic structuring, metadata optimization, and efficient image handling techniques.

Full Stack Developer

June 2024 – September 2025

AIBI

Mumbai, India

- Led the development of scalable web and mobile applications using React.js, React Native, Node.js, and Supabase, following structured SDLC workflows and practices.
- Handled 1,000+ structured records via well-structured APIs, cutting manual overhead and operational workload by 30%.
- Secured application access using JWT-based authentication and role-based authorization (RBAC) mechanisms across modules.
- Added AI-driven capabilities by integrating Gemini API and text-to-speech services to improve application intelligence.
- Optimized backend efficiency and database query execution, raising overall system responsiveness and scalability by 35%.

Mobile Application Developer

December 2023 – May 2024

Sinjan Solutions Pvt. Ltd.

Mumbai, India

- Created a QR-based attendance application using React Native and Firebase with real-time synchronization for 100+ daily records.
- Cut manual verification effort by 40% through workflow automation and streamlined validation processes.
- Stabilized application behavior by refining authentication flows and fine-tuning API interactions across multiple modules.

Web Developer

June 2023 – July 2023

Infosys Technologies

India

- Crafted interactive frontend modules for an e-commerce platform using HTML, CSS, JavaScript, PHP, and MySQL technologies.
- Lowered page reload frequency by 30% using AJAX-driven asynchronous updates for smoother user interactions.
- Boosted database efficiency through indexing strategies and advanced query optimization techniques for faster transactions.

PROJECTS

AI Multiverse – AI Storytelling Platform | *React.js, Tailwind CSS, Node.js, Gemini API, Edge TTS, Cloudinary, Supabase*

- Developed a collaborative AI storytelling platform supporting multi-user input, character selection, and real-time voice-based narrative generation for 5+ concurrent users.
- Combined Gemini API with Edge TTS for sub-3-second story generation and managed 20+ asynchronous API requests with optimized frontend responsiveness.
- Set up efficient state management and media handling using Cloudinary and Supabase, ensuring rapid UI response and scalable content delivery.

Crickify – Real-Time Hand Cricket Game | *React.js, Tailwind CSS, Node.js, Express.js, Socket.IO, Framer Motion*

- Built a real-time Hand Cricket game with single-player and multiplayer modes, achieving under 50ms latency and smooth gameplay synchronization.
- Implemented a WebSocket-based room system with unique match codes and structured turn-based logic ensuring consistent game state across sessions.

StrideX – Full Stack E-Commerce Platform | *React.js, Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, JWT*

- Released a full-stack e-commerce platform featuring product catalog, cart management, and secure checkout, supporting 10+ categories with a smooth user experience.
- Set up RESTful APIs for authentication and order processing, using MongoDB for dynamic data handling and JWT-based route protection.

TermiTalk – LAN Chat System | *Python, Socket Programming, Multi-threading, Tkinter, Queues*

- Made a secure LAN chat system enabling real-time messaging and file sharing without internet, supporting 10+ concurrent users with admin controls.
- Applied a multi-threaded socket architecture with private rooms, IP-based communication, and reliable file transfer with confirmation under 20ms latency.

SPEAKING AND COMMUNITY

4-Day Workshop on React.js and Next.js | *VES Polytechnic, Mumbai*

- Ran a hands-on workshop on modern frontend development and scalable web architecture for 60+ students.
- Walked participants through live project implementation covering React fundamentals, routing, state management, and deployment.

PUBLICATION

QR Attend – Android-Based Attendance Management System | *IJRPR*

- Wrote a peer-reviewed research paper on a QR-code-based automated attendance system with real-time backend validation and Firebase integration.
- Planned and executed a real-time QR authentication workflow for automated attendance tracking, reducing manual effort by 40%.

ACHIEVEMENTS AND CERTIFICATIONS

INVICTUS '25 | *Finalist*

- Reached the finalist position at INVICTUS '25, a competitive intra-college technical fest at VESIT, Mumbai, among multiple participating teams.

Data Structures and Algorithms | *LeetCode & GeeksforGeeks*

- Solved 250+ Data Structures and Algorithms problems on LeetCode and GeeksforGeeks, improving problem-solving skills and algorithmic thinking.
