

# Deepesh Navani

**Phone:** +91 9309324166 | **Email:** deepeshnavani@gmail.com | **Portfolio:** deepeshnavani.vercel.app

**LinkedIn:** linkedin.com/in/deepeshnavani1203 | **GitHub:** github.com/deepeshnavani1203 | **Location:** Mumbai, India

## Summary

Full Stack Developer with expertise building scalable web and mobile applications using React.js, Next.js, Node.js, and React Native. Created REST APIs, integrated AI services, and boosted performance by up to **40%**.

## Technical Skills

**Programming Languages:** JavaScript, Java, Python, C, C++, SQL

**Frontend:** React.js, Next.js, React Native, HTML, CSS, Tailwind CSS

**Backend:** Node.js, Express.js, RESTful APIs, JWT Authentication, Gemini API, Edge TTS, gTTS

**Databases:** MongoDB, MySQL, SQL Server, Supabase, Firebase

**Cloud and Deployment:** AWS, Vercel, Render, Netlify, Railway, Cloudinary

**Tools and Concepts:** Git, GitHub, Postman, Thunder Client, Figma, Android Studio, VS Code

## Education

**Vivekanand Education Society's Institute of Technology, Mumbai**

**Aug 2024 – May 2027**

B.E in Computer Engineering

CGPA: 9.16 / 10

**Vivekanand Education Society's Polytechnic, Mumbai**

**Aug 2021 – June 2024**

Diploma in Computer Engineering

Percentage: 84.97%

## Experience

**Web Developer**

**March 2026 – Present**

Odyssey Homes

Mumbai, India

- Designed and built a luxury real estate portal with **50+** listings, achieving a **95%** mobile responsiveness score.
- Constructed property listing, enquiry handling, and content modules using React.js, Node.js, and MongoDB, cutting update turnaround by **60%**.
- Improved page load speed by **40%** through code splitting, asset compression, and efficient rendering strategies.

**Full Stack Developer**

**June 2024 – September 2025**

AIBI

Mumbai, India

- Led **3+** web and mobile solutions using React.js, React Native, Node.js, and Supabase, adhering to structured SDLC workflows.
- Managed **1,000+** structured records through reliable API endpoints, significantly cutting manual overhead and operational workload by **30%**.
- Secured access for **500+** users via JWT-based verification and role-based authorization, eliminating unauthorized access incidents.
- Integrated Gemini API and advanced text-to-speech services, adding **4** AI-driven features that boosted user engagement by **25%**.
- Streamlined backend and query execution, raising system responsiveness by **35%**.

**Mobile Application Developer**

**December 2023 – May 2024**

Sinjan Solutions Pvt. Ltd.

Mumbai, India

- Developed a QR attendance tracker with React Native and Firebase monitoring live attendance for **100+** users.
- Reduced verification effort by **40%** through process automation and streamlined validation.
- Resolved **15+** critical auth bugs and refined API interactions, achieving **99%** uptime post-launch.
- Executed **200+** test cases, reducing post-release defect rate by **70%** and ensuring a smooth overall journey.

**Web Developer**

**June 2023 – July 2023**

Insys Technologies

India

- Built **5+** responsive web apps using HTML, CSS, JavaScript, PHP, and MySQL, serving **500+** monthly visitors.
- Implemented AJAX-based interactions and optimized frontend workflows, cutting page load time by **30%** and enabling seamless content updates without full-page reloads.
- Optimized database queries through structuring and indexing, cutting execution time by **45%** and resolving **20+** defects.

## Projects

---

### HireSense – AI Career Assistant | *React.js, Node.js, MongoDB, Gemini API, NLP, LLMs, Speech Recognition*

- Engineered an AI-powered job-readiness platform offering **5** core modules — resume analysis, interview preparation, profile generation, career guidance, and ATS scoring — serving **100+** early users.
- Created an ATS resume analyzer that evaluated uploaded CVs and generated **10+** data points of actionable feedback, improving average ATS match scores by **30%**.
- Developed an intelligent assistant using Gemini API, facilitating profile summarization and context-aware conversational support with an average response accuracy of **90%+**.
- Crafted a mock interview module with speech recognition and timer-based responses, delivering AI-driven feedback across **3** dimensions — communication, clarity, and confidence.

### Crickify – Multiplayer Cricket Game | *React.js, Tailwind CSS, Node.js, Express.js, Socket.IO, Framer Motion*

- Engineered a real-time Hand Cricket arena with single-player and multiplayer modes, delivering synchronized gameplay with under **50ms** latency.
- Built a Socket.IO-powered room framework supporting **20+** concurrent matches with unique codes, turn-based logic, automatic reconnection management, and consistent state synchronization.

### StrideX – E-Commerce Platform | *React.js, Node.js, Express.js, MongoDB, Mongoose, JWT, Razorpay*

- Delivered a full-stack e-commerce solution with product catalog, cart management, and Razorpay-integrated checkout supporting **10+** item categories and processing end-to-end transactions in under **2 seconds**.
- Implemented **15+** RESTful API endpoints for authentication, order processing, and payment pipelines, leveraging MongoDB for flexible data handling and JWT-based access control.

### TermiTalk – Real-Time Chat System | *Python, Socket Programming, Multi-threading, Tkinter, Queues*

- Launched a live messaging platform supporting private rooms and file sharing for **10+** concurrent users, maintaining **99%** message delivery reliability.
- Architected a multi-threaded socket infrastructure with direct messaging, admin controls, and file transfer capabilities, slashing message delivery delays by up to **40%**.

## Speaking and Community

---

### 4-Day Workshop on React.js and Next.js | *VES Polytechnic, Mumbai*

- Conducted a hands-on session on modern frontend development and scalable web architecture for **60+** students.
- Guided participants through live project implementation covering React fundamentals, routing, state coordination, and deployment.

## Publication

---

### QR Attend – Android-Based Attendance Management System | *IJRPR*

- Authored a peer-reviewed research paper on a QR-code-based automated presence-tracking solution with real-time backend validation and Firebase integration.
- Planned and executed a QR authentication workflow for automated check-in tracking, reducing manual effort by **40%**.

## Achievements

---

**Invictus '25** | Finalist at VESIT Technical Competition

**Need For Code 4.0 '25** | Top 12 Finalist at TSEC

**Data Structures and Algorithms** | Solved 300+ Problems on LeetCode and GeeksforGeeks
